To Whom It May Concern:

RE: Jeffery Luhn Recommendation

It is my great pleasure to recommend Jeffery Luhn for a teaching position at your institution. Mr. Luhn is a long-standing member of the Cabrillo College Community Education Program and I have personally worked with him for the past five years. He provides an excellent level of instruction and commitment to our program and students.

His academic training and business experience has added tremendously to our course offerings. That has included the creation of new courses, curriculum development and marketing techniques to help build enrollment and the student experience. Mr. Luhn has taught over 10 individual workshops for us, an average of 30 throughout the year. These include: Digital Photography Levels 1 & 2, outdoor photography, various portraiture workshops and in specialty areas like Night Photography, Video Production and lectures on the use of images in marketing. Most recently, I also worked with him to produce several marketing videos to highlight our programs and was absolutely thrilled with the product.

Evidence of his teaching abilities is reflected by consistent student evaluations ranking him as "Excellent" on a 5 level scale. Our student body is quite diverse in educational level, language skills and socio-economic backgrounds. Mr. Luhn has found common ground with our students and created a learning environment that leaves the students with the skills necessary for success, whether it be personally or professionally. I unreservedly recommend Jeffery Luhn for a teaching position at your institution. He would make an excellent faculty member in your program.

Most sincerely,

Scott Johnson

Director, Community & Contract Education
